Vital signs

178 recent articles in the cluster

178 articles in this cluster were published in the five year period ending in 2023.

Average article is **23.92** years old

The average age of articles in this cluster. However, most Map of Science metrics are calculated using articles from the past five years only.

Growth rating: **22.85th** percentile

Over the three year period ending in 2023, this cluster grew faster than roughly 22.85% of other clusters.

Citation rating: **33.30th** percentile

A cluster's citation rating is equal to the average citation percentile for all the articles in the cluster. Citation percentiles are calculated relative to articles of the same publication year. In this case, the average article in this cluster is cited more often than roughly 33.30% of all other articles published in the same year.

70.79% of articles are in English

Not expected to grow extremely fast

As determined by ETO's growth prediction model. [Read more.](#)

Countries and languages

Top author countries

Each row lists the number of articles in this cluster from the last five years with at least one author from an organization in the specified country. Data available for 129 of 178 articles. 100 of these articles had at least one author from an organization in these ten countries.

Country	Articles (five year period ending in 2023)	Yearly citations per article (average)
